

## ABSTRACT

2 A low profile generator mount for large vehicles, such as  
3 tractor trailer combinations, utilizes the space below the door  
4 of the cab. The mount is an enclosure connected to the frame  
5 and housing a compact diesel engine and generator combination  
6 with the exterior of the mount capable of being in the form of  
7 steps for ingress into the cab, or formed to assimilate a  
8 conventional truck mounted storage box.
